

 D MARIS BAY	WATER EFFICIENCY POLICY	Document Code	EK-4
		Revision No	00
		Revision Date	25.03.2026

At D Maris Bay, the protection, efficient use, and sustainable management of water resources are among our fundamental priorities. We carry out our activities with the aim of reducing water consumption, protecting water resources, and ensuring their transfer to future generations.

Within this scope, we commit to:

- Ensuring sustainable use of water resources, reducing consumption, and preventing losses,
- Analyzing water efficiency performance, setting objectives, and adopting continuous improvement,
- Regularly monitoring, measuring, analyzing, and reporting water consumption,
- Expanding the use of water-efficient equipment, fixtures, and technologies,
- Identifying water losses and implementing preventive and corrective actions,
- Reducing water consumption in landscape areas through drought-resistant planting and efficient irrigation,
- Reducing wastewater generation and ensuring proper management,
- Raising employee awareness on water efficiency through training programs,
- Encouraging guests to contribute to water conservation,
- Supporting suppliers and business partners alignment with water efficiency principles,
- Ensuring full compliance with Blue Water Efficiency Certificate criteria and Ministry of Agriculture and Forestry,
- Regularly reviewing water efficiency performance for continuous improvement.

As D Maris Bay, we commit to conducting our activities with an approach that prioritizes the protection of water resources, minimizes environmental impacts, and supports sustainable water management.
